EDUCATION

Clemson University
Bachelor's of Science, Computer Science

- Cumulative GPA: 4.0/4.0 | President's List
- Relevant Coursework: Operating Systems, Software Engineering, Database Management Systems, Usable Privacy and Security, Virtual Reality Systems, Computer Organization, Discrete Structures for Computing

Aug 2024 — May 2027
Clemson, SC

WORK EXPERIENCE

Data Center Power Monitoring and Configuration Technician
Clemson University IT Infrastructure and Operations

- Configured and monitored 400+ power and cooling devices, ensuring optimal environmental conditions for university-wide server infrastructure
- Collaborated with network engineers to troubleshoot connectivity issues, utilizing SNMP and ACL configurations to integrate devices into the central management network
- Administered Schneider EcoStruxure to streamline the configuration of critical infrastructure devices, significantly accelerating bulk firmware deployments and security updates

August 2025 — Present
Anderson, SC

Bar Manager and Barista
Cure Coffeehouse and Three Ships Coffee Roasters

- Trained 10+ employees, establishing clear service protocols and communication standards to improve team performance
- Managed floor operations and vendor negotiations, ensuring inventory efficiency for a high-volume location
- Tracked and fulfilled 100+ daily orders in a high-volume environment, maintaining strict quality standards and resolving issues promptly to guarantee customer satisfaction

April 2019 — May 2023
Norfolk, VA

PROJECTS

Dynamic Memory Allocator

- Engineered a thread-safe memory allocator in C that manages virtual memory pages via POSIX system calls and utilizes a segregated free list architecture to achieve constant-time deallocation
- Technologies: C, POSIX (mmap/munmap), Segregated Free Lists, Bitwise Arithmetic, Memory Alignment, Multi-threading (Thread-safety)

Inventory Management System

- Engineered a comprehensive restaurant management system in Java featuring a normalized MySQL database to streamline real-time order processing and automated business intelligence reporting.
- Technologies: Java, JDBC, MySQL, SQL (JOINS, Views, Aggregations), Business Intelligence

Delivery Application

- Developed a scalable serverless microservices architecture using AWS to manage RESTful API routing, account management, and complex NoSQL data filtering within an Agile development lifecycle
- Technologies: AWS (Lambda, API Gateway, DynamoDB), Node.js, RESTful APIs, OpenAPI, NoSQL, CRUD, Agile/Scrum

EXTRACURRICULAR ACTIVITIES

Clemson Cybersecurity Club

- Developing SOC-aligned skills in threat analysis using advanced tools
- Hands-on Workshops
 - Reverse Engineering, Honeypot Design and Deployment, Capture the Flag Exercises

December 2024 — Present

SKILLS

- Programming Languages:** C, C++, Java, JavaScript, Python, R, SQL
- Technologies:** AWS Cloud Services, JDBC, Linux, CLI, Agile, Software Design Principles, Unity Development
